

CT, Ip/5 A ratio

⚠ Important precaution

- Never disconnect the secondary circuit of a current transformer with measurement equipment when the primary circuit is energised.
- Prior to working on the secondary circuit, the secondary terminals of the current transformer must be short-circuited.

The Ip/5A ratio current transformer delivers at the secondary a current (I_s) of 0 to 5 A that is proportional to the current measured at the primary (I_p).

This allows them to be used in combination with measurement equipment:

- ammeters
- kilowatt-hour meters
- measurement units
- control relays
- etc.

Application diagram of a CT.

CT selection - conductor rating aspects

The choice depends on the conductor profile and the maximum intensity of the primary circuit.

CT with let-through primary

Conductor type	Cable	Mixed, bars or cables	Vertical or horizontal bars	Vertical bars	
Suggested Current Transformer and mounting		 	 		
Ratings (A)	40 to 250	150 to 800	200 to 4000	500 to 600	5000 to 6000
CT internal profile	Type C	Type M	Type D ⁽¹⁾	Type V	

⁽¹⁾ Two secondary connectors (parallel internal wiring - only one secondary winding) for easier cable access. 1 lateral + 1 on one extremity. Warning: only one must be used at a time.

Specific mounting: use of cylinder

A cylindrical metallic spacer ensures a proper CT positioning when the conductor or the CT cannot be positioned perpendicular. Secured by bolt + nut.

CT with primary connection by screw and nut (example: use of cylinder with bar or cable)

16550 (brass)

METSECT5CYL1 (aluminium)

CT, Ip/5 A ratio

CT selection - Electrical aspect Ip/5 A

■ We recommend that you choose the ratio immediately higher than the maximum measured current (In).

Example:

In = 1103 A; ratio chosen = 1250/5.

■ For small ratings:

from 40/5 to 75/5 and for an application with digital devices, we recommend that you choose a higher rating, for example 100/5.

This is because small ratings are less accurate and the 40 A measurement, for example, will be more accurate with a 100/5 CT than with a 40/5 CT.

■ Specific case of the motor starter:

to measure motor starter current, you must choose a CT with primary current $I_p = I_d/2$ (I_d = motor starting current).

Validation of measurement solution according accuracy class

It consists in controlling the right adaptation of the CT on the accuracy class aspect. The accuracy class is specified in the project. The total dissipated power of the measurement circuit (meter + cables) should not be superior to the specified limit of the CT. This limit is for different standard classes. If necessary, the choice of the cable section, the CT or meter should be modified to fit the requirement.

Copper cable cross-section (mm ²)	Power per doubled meter at 20 °C (VA)	Schneider Electric device	Consumption of the current input (VA)
1	1	Ammeter 72 x 72 / 96 x 96	1.1
1.5	0.685	Analogue ammeter	1.1
2.5	0.41	Digital ammeter	0.3
4	0.254	PM700, PM800	0.15
6	0.169	PM3000	0.3
10	0.0975		
16	0.062		

For each temperature variation per 10 °C bracket, the power drawn up by the cables increases by 4 %.

Application example

Project specification: **200 A**, in **Ø27 mm** cable, accuracy class 1.

Our choice is **METSECT5MA020**.

For this CT selected on the chart (next page), the max acceptable power is **7 VA** (for "Accuracy class 1" which is specified in the project).

Internal profile type	Cables (mm)	Bars (mm)	Rating Ip/5 A (A)	Cat. no.	Accuracy class	Max. power (VA)
					0.5 1 3	
MA						
	Ø27	10 x 32	150	METSECT5MA015	3	4
		15 x 25	200	METSECT5MA020	4	7
			250	METSECT5MA025	6	8
			300	METSECT5MA030	8	10
			400	METSECT5MA040	10	12

Control of the conformity of the measurement chain:

■ PM3000 multi-meter: 0.3 VA.

■ 4 meters of 2.5 mm², doubled wires: 0.41 x 4 = 1.64 VA.

Total: 0.3 + 1.64 = 1.94 VA (< 7 VA)

Conclusion: this CT is well adapted as the accuracy class will be even better than 1.

Common characteristics

Secondary current Is (A)	5
Maximum voltage rating Ue (V)	720
Frequency (Hz)	50/60
Safety factor (sf)	■ 40 to 4000 A: sf ≤ 5 ■ 5000 to 6000 A: sf ≤ 10
Degree of protection	IP20
Operating temperature	■ tropicalised range ■ -25 °C to +60 °C ⁽¹⁾ ■ relative humidity > 95 %
Compliance with standards	■ IEC 61869-2 ■ VDE 0414
Secondary connection (as per model)	■ by terminals for lug ■ by tunnel terminals ■ by screws

⁽¹⁾ **Warning:** some products are limited to +50 °C.
