

Esmi Impresia ELC Fire Range Offering

To meet the challenges of today and the future, Schneider Electric offers new innovative online applications. Schneider Electric has launched the new Esmi Sense fire detection panels, and together with the EcoStruxure Fire Expert application, the Esmi Sense FDP is the first real online Fire Detection Solution. With Fire Expert, the user can monitor online and manage their fire systems with a PC, a smartphone, or a tablet anytime, anywhere. A full range of Esmi Impresia detectors can be connected to the system.

Esmi Impresia - Many Possibilities

EcoStruxure Fire Expert provides a unique under the detector auto-addressing solution to Esmi Impresia, which has never been seen in another EN54 products in the world. Schneider Electric offers a new remarkable way to save time by addressing devices using a smart device and utilizing a QR code. Each device in the Esmi Impresia range has this one of a kind feature.

The Esmi Impresia Range includes the following features:

- Address range is 1-250
- All products include in-built isolators
- Heat, smoke and multicriteria detectors
- Addressing ID numbers with QR code scanned by a smart device
