

**Quick and easy**

The attractive glass design and quick boiling make this kettle a must-have for any modern kitchen. The great visibility of the glass kettle means you can easily see when your kettle needs to be cleaned. And it saves you time when cooking or making hot drinks as you can check when the water is heated to the level you desire.

Kuluttajahyödyt & ominaisuudet**Attractive glass design**

Made from glass and stainless steel, this attractive kettle looks great on your countertop. The 1.7L durable glass jar allows complete visibility, so you can heat up the water to your desired preference.

Safe and fast

The anti-boil dry function turns off the kettle off when there's no water, and auto-off does the same when it's reached boiling point. By heating up your water in a glass water kettle, you also save time when cooking.

Cordless convenience

The Create 4 kettle's cordless design features a 360° rotatable base and one-handed lid opening for your convenience.

Easy to clean

The large opening allows easy access inside of your kettle, while the glass design means you can see exactly when your kettle needs cleaning. By hiding the kettle's heating element inside the base, your kettle is also less prone to rust and limescale buildup.

Anti-scale filter

The anti-scale filter keeps water quality pure for longer, resulting in better tasting boiled water.

- Automaattinen virrankatkaisu
- 360° kääntyvä

Tekniset tiedot

Merkki	Electrolux
Väri	Transparent
