

Total control with the Explore 7 Water Kettle

Whether you're boiling water, brewing tea or gently warming ingredients, the Explore 7 Kettle allows customised heating. Adjustable controls so you can achieve the perfect temperature, every time. And even maintain that temperature for 40 minutes.

Product Benefits & Features

Temperature tailored to your taste

The Explore 7 kettle is designed to make achieving and maintaining the perfect temperature easy, with precise control settings. Whether it's baby food at 40°C, green tea at 80°C, or coffee at 95°C, the kettle will automatically stop heating when it reaches the temperature you've selected.

- Removable scale filter
- ON/Off switch with pilot light

Your temperature, maintained for 40 minutes

Your chosen temperature will be maintained for up to 40 minutes with the Explore 7 kettle and its keep-warm function. The element concealed in the kettle's base will activate every time the water's warmth drops by 2°C.

Smooth-access lid, for easy cleaning

The Explore 7's lid opens up in one smooth motion, avoiding unwanted splashes. Its large size is spacious enough to fit your whole hand in, making cleaning a breeze. And when it comes to everyday use, the kettle can be returned to its 360-degree base in any direction.

Safety features come as standard

The Explore 7's non-slip base puts safety first, reducing any risk of slippage and spillage. The kettle will also automatically turn off when empty, cutting the power as soon as it detects that there's not enough water in the reservoir.

Scale filter, for better taste

Fitted with a scale filter, the Explore 7 prevents impurities in your water from entering your cup, for better tasting boiled water for longer.

Product Specification
