

A complete system.

Our ventilated facade system is studied down to the smallest details and is a complete solution that can be installed simply and easily.

Fibre cement panels

James Hardie® panels have an elegant and versatile architectural footprint that will give your facade high performance and durability.

- **Non-combustible (A2-s1, d0)**

James Hardie® panels are non-combustible and achieve fire reaction class A2-s1, d0.

- **Endless aesthetic combinations**

Textures, thicknesses and colors to suit every type of project.

- **Quality and sustainability**

We meet the strictest quality and sustainability standards, certified to European standards.

Fibre cement panels

Simple to install, Hardie® Panels can be installed with exposed or concealed fasteners on wood or metal structures. With selected partners, we can provide you with the optimal solution according to specific project requirements.

Complementary accessories

Our accessories (profiles, rivets, fasteners, screws, paints) have been developed for easy and perfect installation, offering a complete system to rely on.

Ventilated facade system with James Hardie, It's Possible™

Hardie® Architectural Panel

Hardie® Architectural Panel is available in two textures: Smooth Sand and Brushed Concrete. These textures will enable you to build modern, contemporary designs – specifically formulated to give you a long-lasting and low maintenance, consistent finish for years to come.

Hardie® Architectural Panel Metallics

Your perfect match: Hardie® Architectural Panel Metallics combines the advantages of fibre cement facade cladding with a metallic look. Elevating your design flexibility to a new level.

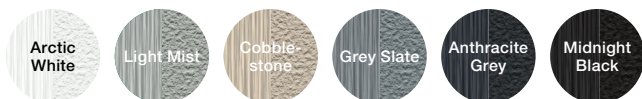

Hardie® Panel

Hardie® Panel is available in a natural fibre cement texture and a variety of core colours – and if you need something special, you can choose from almost any colour – for your individual design.

A modern look

Our standard colour range gives a choice of minimalistic white, grey beige or black tones to choose from. Pure one coloured facades or a combination of them will give your building a unique, modern and clean style. And for an even more individual aesthetic look you can request your individual **Custom colour**, on each of our surfaces.

Setting accents

Our Metallics colourline has been inspired by typical metal materials, combining them with the unique look of our fibre cement surface. When exposed to natural sunlight, the facade panel will show its metallic sparkling, allowing you to integrate special accents into your building.

A modern look

For your individual look, you can play with one of our standard colours from the modern colourline we offer. Or further upgrade your building by adding in or choosing your individual **Custom colour**.
